

FREQUENTLY ASKED QUESTIONS

WHAT MAKES THE INFINITINI CRAPE MYRTLE DIFFERENT?

This is a dwarf Crape Myrtle that grows only about 2-4 feet tall and wide, so rather than being a tall lanky plant, this is a wonderful flowering shrub. Along with that, rather than just producing flowers at the top of the plant like traditional crape myrtle, the Infinitini will produce flowers on all sides of the plant and from top to bottom. You can expect dense clusters of colorful flowers all summer long.

WHEN WILL IT BLOOM?

The Infinitini Crape Myrtle is considered a continuous rebloomer meaning that once it starts to produce flowers in the early summer, it will continually produce new flowers all summer long, never taking a rest.

WHERE DO THEY LOOK BEST IN THE GARDEN?

Because they are shorter than typical Crape Myrtle, the possibilities on where to plant them are so much greater. This flowering shrub looks great planted along the edges of the home, placed at the corners of the garden, next to evergreen shrubs, or as a focal point in your sunny perennial garden.

CAN I GROW THEM IN CONTAINERS?

Yes, this short crape myrtle looks fantastic in containers and if placed on your patio or porch, you will be so impressed on the quantity and duration of blooms that your Infinitini will produce. They also look great when paired on each side of the sunny entrance to your home.

DO I NEED TO PRUNE MY PLANTS?

As a matter of fact, you do not need to prune these plants. However, if you do wish to shape your crape myrtle a bit, the best time to shape it is in the autumn after the blooming season has ended.

FIRST THINGS FIRST...

When your plant arrives from Roberta's, remove from the shipping box immediately.

Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves that may have occurred during transit. If you can not plant it into garden or larger pot within a few days, make sure it stays well watered.

When ready to plant, do the job as early in the day as possible to avoid extreme soil temperatures that prevent proper water uptake from the roots. Water them in well and whisper a few words of wisdom.

Our Warranty (Perennials)

We aren't happy if you aren't happy. If you have any questions regarding your order please call us at 1-800-428-9726 during the hours of 8:30am and 4:30pm EST.

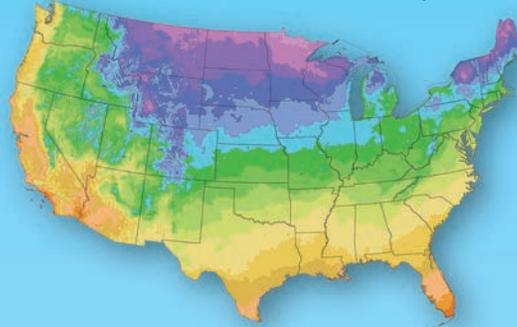

You can email questions to us at:
plantquestions@robertasinc.com.

If your bulbs, cuttings etc. do not sprout, or your plant dies within one year from the date of shipment, we will send you a replacement free of charge. We cannot accept responsibility for losses due to extreme weather or neglect. Simply call us at the above toll free number or fill out the plant replacement form on our website at www.robertasinc.com.

Roberta's will replace it with a similar or comparable plant at no charge. If your replacement is not available or it is too late in the season to ship, it will ship the following year.

Neither the retailer nor any other company involved in the sale or promotion of this product is a co-warrantor of this plant warranty.

QUICK REFERENCE PLANTING GUIDE

LIGHT/SUN EXPOSURE:	Full Sun
USDA HARDINESS ZONES:	6-12
PLANT TYPE	Perennial
PLANTING DISTANCE:	2-4 feet
MATURE HEIGHT/SPREAD:	2-4 feet 2-4 feet
BLOOM TIME:	Summer by second season
PLANTING INSTRUCTIONS: <small>(soil preparation, depth, which end is up, etc.)</small>	Remove plastic bag and/or sleeve from around potted plant(s). Transplant into the garden as soon as evening temperatures stay above 40F. Rather than in the garden you may re-pot into large containers.

PLANTING GUIDE

1
STEP

Remove plastic bag and/or sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves that may have occurred during transit. If you cannot plant it into garden or larger pot within a few days, make sure it stays well watered.

2
STEP

Transplant into the garden as soon as evening temperatures stay above 40F. Dig holes twice the width of the root ball and about 5 to 6 inches deep. Place them in their holes. Pack soil firmly around roots. Fill with soil and pack in firmly covering entire root zone. Water again. Plants prefer full sun to half day of sun.

3
STEP

Rather than in the garden you may re-pot into large containers that are at least 18 inches.

4
STEP

Planted now they will produce flowers in summer.

CONTINUING CARE

SHELF LIFE

Plant into garden or larger pots and place outside immediately after the night temperatures stay above 40 degrees.

PLANT PREPARATION

Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves that may have occurred during transit. If you cannot plant it into garden or larger pot within a few days, make sure it stays well watered.

SOIL

Grow in fertile, moist but well-drained soil. Amend clay type soils with compost or potting mix.

GARDEN PREPARATION

They prefer full sun.

POTTED PLANTS

Rather than in the garden you may re-pot into large containers that are at least 18 inches.

PLANTING SPACING

If planting in garden space 2 to 4 feet apart.

PLANT HEIGHT AND WIDTH

These grow about 2 to 4 feet tall and wide.

WATER

Water upon planting and a couple times a week all summer long.

FERTILIZER

They respond to feeding with a high bloom fertilizer like Flower Magic plant food (M7503). Once a month is sufficient.

TEMPERATURE ZONES 6 to 12

When nights stay above 40 degrees, place your plants outside and leave them there. They can withstand winter temperatures to minus -5F.

LIGHTING

In the summer growing season, full sun is best, at least 6 hours of sunlight.

BLOOMING

Under correct conditions, blooming is in the summer.

PRUNING

Pruning is not necessary. However, if your plants are becoming a bit unruly and you wish to shape their growth, the best time to clean up your plant is in the fall after the bloom season has ended.

WINTERIZING

If you live where temperatures stay below freezing for much of the winter, it is recommended that you add an extra layer of mulch at the base of the plant in autumn before winter commences.
