

FREQUENTLY ASKED QUESTIONS

WHEN CAN I EXPECT BLOOMS?

These will bloom from late spring throughout into mid- fall.

DO THEY LIKE SHADE?

These prefer full to partial sun. Sun really makes a difference in blooming.

WHAT MAKES THESE SO AMAZING?

The Candy Flowers Geranium are one of the easiest and most rewarding bedding plants you can have in your garden. They are quite tolerant of heat which makes them a great choice for containers and window boxes. But the best part of these plants is the bright, two-tone colorful flowers that you'll have for months on end.

WHERE DO THESE LOOK BEST IN LANDSCAPE?

Well suited for container plantings, window boxes, garden borders, & mass plantings in beds.

WILL THE CRITTERS EAT THEM?

They look so yummy but deer and rabbits leave them alone.

WHAT IS NEEDED FOR WINTER CARE?

These are annuals and can't take a freeze. In warm winter areas, plants often do not rest even after 3 years!

FIRST THINGS FIRST...

When your plant arrives from Roberta's, remove from the shipping box immediately.

Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves that may have occurred during transit. If you can't plant it into garden or larger pot within a few days, make sure it stays well watered.

When ready to plant, do the job as early in the day as possible to avoid extreme soil temperatures that prevent proper water uptake from the roots. Water them in well and whisper a few words of wisdom.

Our Warranty (Annuals and Tropical Plants)

We aren't happy if you aren't happy. If you have any questions regarding your order please call us at 1-800-428-9726 during the hours of 8:30am and 4:30pm EST.

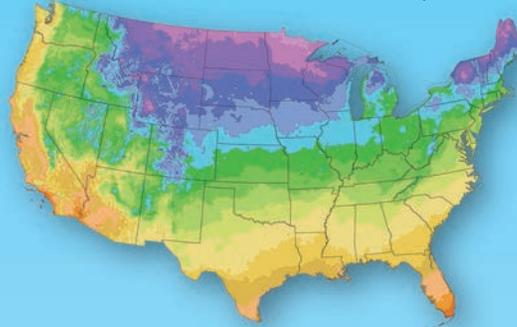

You can email questions to us at:
plantquestions@robertasinc.com.

If your bulbs, cuttings etc. do not sprout, or your plant dies within 90 days from the date of shipment, we will send you a replacement free of charge. We cannot accept responsibility for losses due to extreme weather or neglect. Simply call us at the above toll free number or fill out the plant replacement form on our website at www.robertasinc.com.

Roberta's will replace it with a similar or comparable plant at no charge. If your replacement is not available or it is too late in the season to ship, it will ship the following year.

Neither the retailer nor any other company involved in the sale or promotion of this product is a co-warrantor of this plant warranty.

PLANTING INSTRUCTIONS:	Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Transplant into a larger 12-16 inch container or together in larger containers with adequate drainage holes.
<small>(soil preparation, depth, which end is up, etc.)</small>	

PLANTING GUIDE

1
STEP

Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves or spent flowers that may have occurred during transit. If you cannot plant it into garden or larger pot within a few days, make sure it stays well watered.

2
STEP

Transplant into a larger 10-12 inch container or together in larger container with adequate drainage holes. They can also be planted directly in garden spacing adequately. Water in well.

3
STEP

You should place plants outside as long as evening temperatures stay above 50 degrees Fahrenheit.

4
STEP

Planted now, plants should bloom from the summer to the first frost.

CONTINUING CARE

PLANT PREPARATION

Remove plastic bag and sleeve from around potted plant(s). Discard any packing material clinging to the leaves or soil. Pull away any yellow or brown leaves that may have occurred during transit. If you cannot plant it into garden or larger pot within a few days, make sure it stays well watered.

POTTED PLANTS

Repot the plants into larger 10 to 12 inch pots separately or together in larger containers.

SOIL

They like bagged potting mixes for houseplants that will drain well. Most garden centers carry various brand names with perlite, vermiculite, soil and sand.

GARDEN PREPARATION

If your soil is clayish amend it with a standard garden soil for adequate drainage.

PLANTING SPACING

If planting into the garden space them 12-18 inches apart. If planting into a container allow for adequate air ventilation on deck or patio.

PLANT HEIGHT AND WIDTH

These grow about 12-18 inches tall and wide.

WATER

They are incredibly sturdy plants that need no more care than the average watering. These are exceptionally heat tolerant, making them the perfect water wise plant for your garden.

FERTILIZER

To promote more flowers use a well balanced fertilizer like Roberta's Flower Magic Plant Food (M7503) once a month April through August.

LIGHTING

These prefer full to part sun.

BLOOMING

They bloom from late spring until mid-fall.

TEMPERATURE ZONE 9 to 11

When nights stay above 50 degrees, place your plants outside and leave them there all season.

WINTER SEASON

If you live where the winters dip below 35F, bring the containers inside the home, basement, shed, garage or anywhere else that will shelter your plants from the cold. In the following spring, once the threat of frost is eliminated bring plants back outdoors. If you live where winters are warm, plants may continue blooming all winter long.
